SPOC

HEAD OF THE DEPARTMENT

ACKNOWLEDGEMENT

At the outset, we express our heartfelt gratitude to God, who has been our strength to bring this project to light.

At this pleasing moment of having successfully completed our project, we wish to convey our sincere thanks and gratitude to our beloved president **Mr.C.BALAKRISHNAN**, who has provided all the facilities to us.

We would like to convey our sincere thanks to our beloved principal, **Dr.PSS.SRINIVASAN**, who forward us to do our project and offers adequate duration to complete our project.

We express our sincere thanks to **Dr.P.SACHIDHANANDAM**, Head of the Department of Information Technology, for fostering the excellent academic climate in the department.

We express our pronounced sense of thanks with deepest respect and gratitude to our Faculty Mentor **Mr.R.AYYAPPAN**, Assistant Professor, Department of Information Technology, for his valuable and precious guidance and for having amicable relation.

With deep sense of gratitude, we extend our earnest and sincere thanks to our SPOC **Mr.T.KARTHIKEYAN**, Assistant Professor, Department of Computer science and Engineering , for his guidance and encouragement during this project.

We would also like to express our thanks to all the faculty members of our department friends and students who helped us directly and indirectly in all aspects of the project work to get completed successfully.

CHAPTER-1

PROJECT SPECIFICATION

1.1 Project Goal

Building an Employee Travel Approval Application for corporate use within the Salesforce platform involves a multi-faceted approach, starting with requirements gathering to define user roles and workflows. A well-structured data model captures essential information, and user-friendly interfaces for both employees and managers streamline the travel request and approval process. Workflow automation facilitates efficient routing and notifications, while integrations with external systems like expense management tools enhance data accuracy.

Robust reporting and analytics tools offer insights, and mobile app development ensures accessibility on-the-go. Security and compliance measures safeguard sensitive data, and thorough testing ensures a reliable application. Training and documentation support user adoption, and ongoing maintenance and improvements address evolving needs. Scalability planning and future enhancements cater to growing demands, while comprehensive documentation maintains transparency, ultimately streamlining the travel approval process and enhancing efficiency.

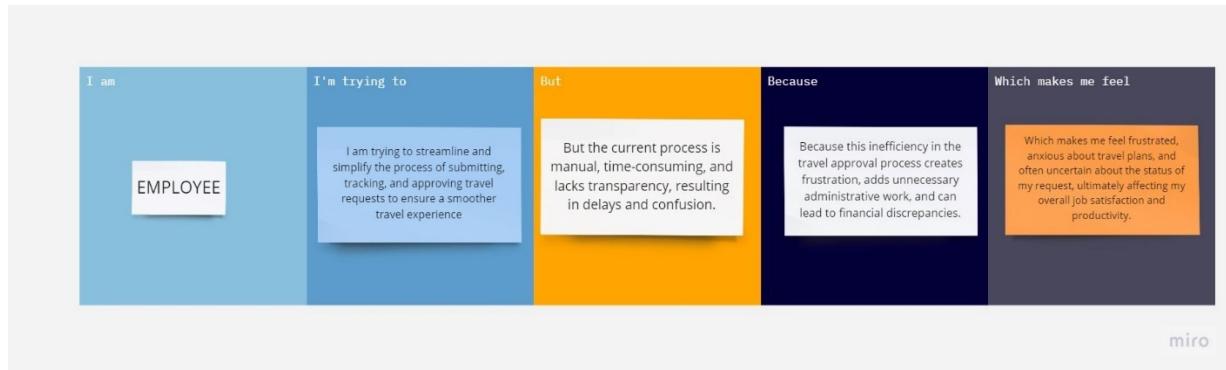

1.2 Project Scope

The Employee Travel Approval Application built in Salesforce serves a vital purpose in corporate travel management. Firstly, it streamlines and automates the often complex and time-consuming travel request and approval process. This efficiency results in reduced administrative burdens, faster approval times, and improved communication between employees and managers. With the ability to centralize all travel-related data, the application ensures data accuracy and compliance with corporate policies and regulatory requirements, contributing to better financial management and accountability.

The application fosters transparency throughout the travel approval workflow. Both employees and managers can easily track the status of travel requests, which enhances visibility into the process. By providing a clear overview of approval progress, it minimizes potential delays and miscommunication, ultimately improving the user experience and helping employees plan their travel more effectively.

The Employee Travel Approval Application in Salesforce offers robust security, ensuring that sensitive data is protected while also providing scalability for future growth. The built-in reporting and analytics tools offer insights into travel expenses and approval metrics, supporting data-driven decision-making. By facilitating on-the-go access through mobile app development, the application empowers employees and managers to manage travel efficiently and enhances the organization's overall travel management capabilities. In conclusion, the application optimizes corporate travel management by enhancing efficiency, transparency, and control, ultimately leading to cost savings and a more seamless user experience.

1.3 Problem Statement Definition

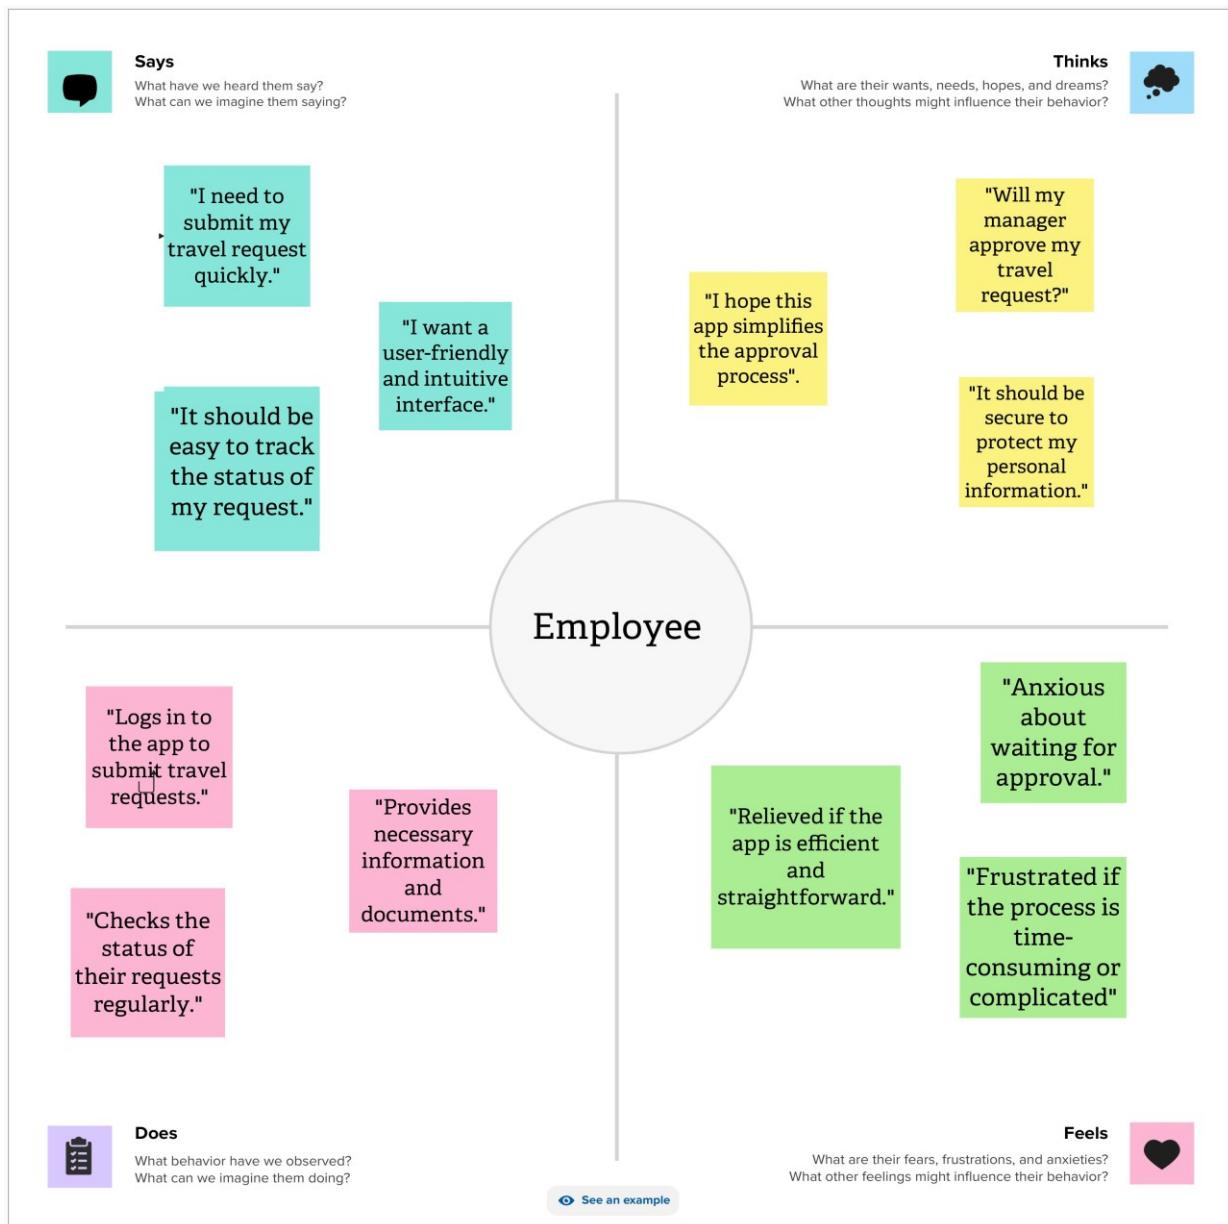

Problem Statement (PS)	I am (Employee)	I'm trying to	But	Because	Which makes me feel
PS	Employee	I am trying to streamline and simplify the process of submitting, tracking, and approving travel requests to ensure a smoother travel experience	But the current process is manual, time-consuming, and lacks transparency, resulting in delays and confusion.	Because this inefficiency in the travel approval process creates frustration, adds unnecessary administrative work, and can lead to financial discrepancies.	Which makes me feel frustrated, anxious about travel plans, and often uncertain about the status of my request, ultimately affecting my overall job satisfaction and productivity.

1.4 Empathy Map Canvas

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behavior and attitudes.

It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

1.5 Ideation & Brainstorming

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement:

The template is divided into several sections:

- Template**: A sidebar on the left containing a lightbulb icon and a wavy line, with a link to "Brainstorm & idea prioritization".
- Brainstorm & idea prioritization**: The main content area.
 - Define your problem statement**: A section with a timer icon and a brief description of the project aim.
 - Before you collaborate**: A section with a timer icon and a brief description of preparation.
 - Key rules of brainstorming**: A section with a timer icon and a list of rules:
 - Stay in topic.
 - Defer judgment.
 - Go for volume.
 - Encourage wild ideas.
 - Listen to others.
 - If possible, be visual.
- Footer**: A dark footer bar with a small icon and a link to "Need some inspiration?".

Step-2: Brainstorm, Idea Listing and Grouping:

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

⌚ 10 minutes

TIP
You can select a sticky note and click the pencil [pencil] icon to start drawing!

Person 1	Person 2
User-Friendly Dashboard: Create an intuitive dashboard for employees to submit travel requests and track their status.	Manager Approval Workflow: Implement a workflow that allows managers to review and approve travel requests easily.
Person 3	Person 4
Notification System: Implement a notification system to keep employees informed about the status of their travel requests.	Real-Time Currency Conversion: Provide a currency conversion feature to help employees manage expenses in different currencies.
Travel Policy Integration: Include the company's travel policy within the app, ensuring employees are aware of guidelines and restrictions.	Expense Management: Allow employees to submit expense reports related to their trips and attach receipts
Analytics and Reporting: Generate reports for corporate administrators to analyze travel patterns and expenses.	Manager Approval Workflow: Implement a streamlined workflow that allows employees to submit travel requests, and managers to easily review and approve them within the application. This ensures a quick and efficient approval process.
Expense Management and Reporting: <ul style="list-style-type: none"> Build a comprehensive expense management system that allows employees to submit and track expenses related to their trips. Include features for attaching receipts and generating expense reports, simplifying financial aspects of corporate travel. 	

3

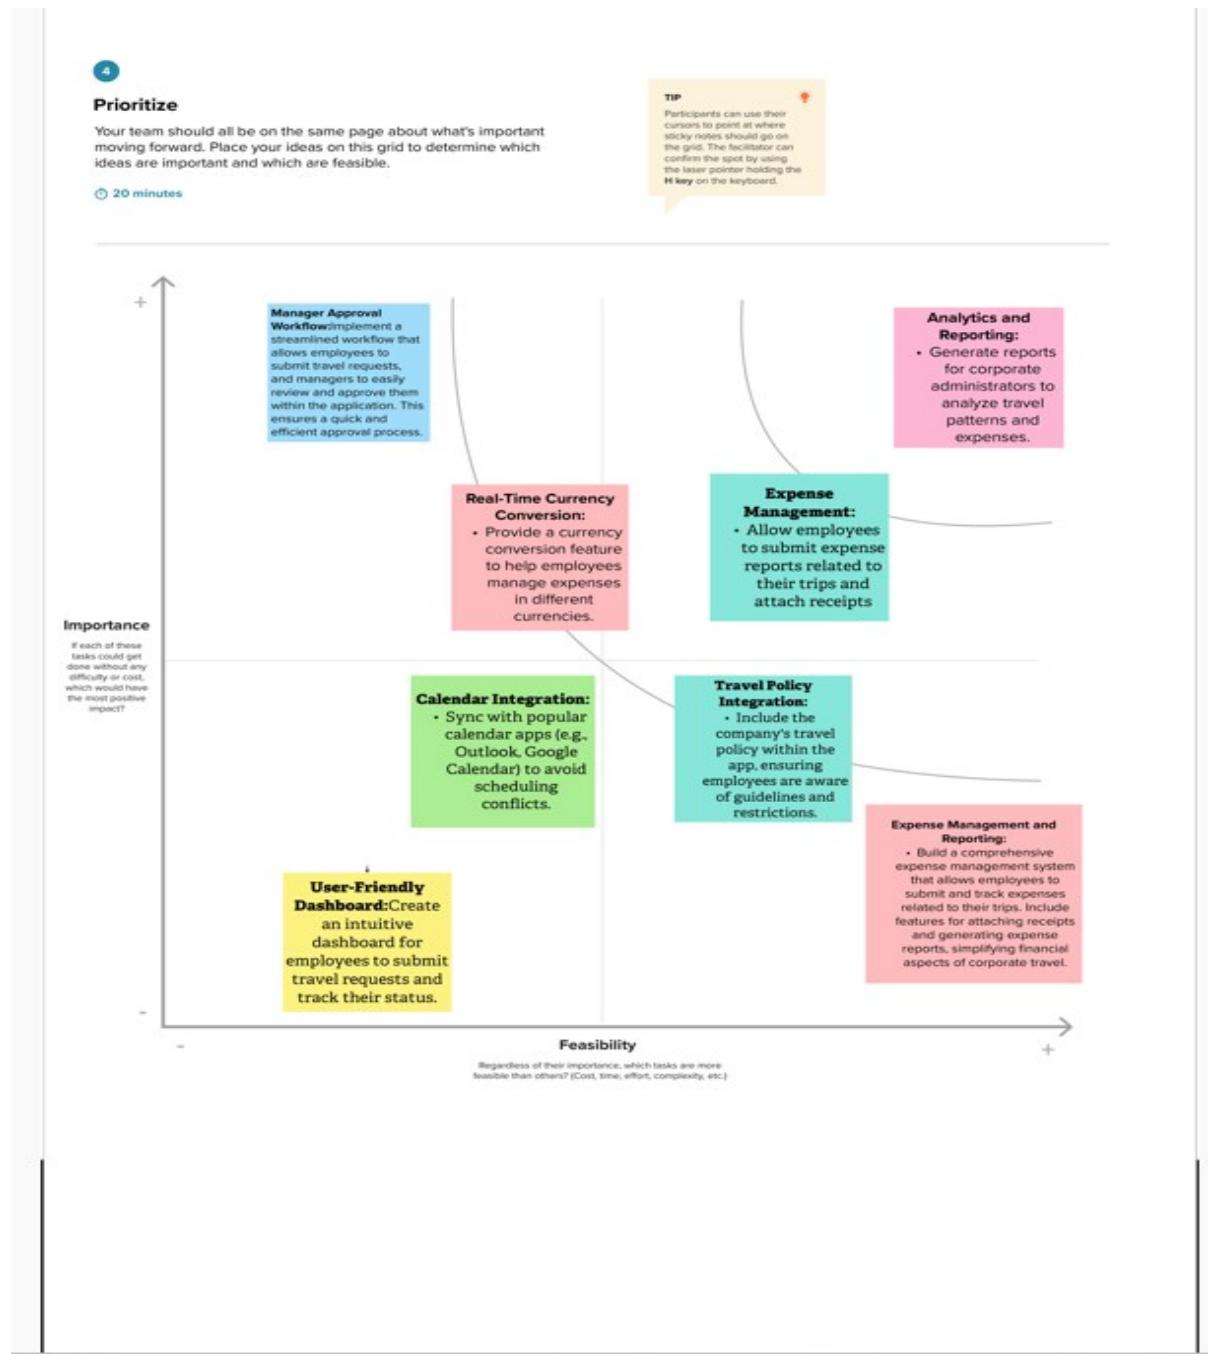

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

⌚ 20 minutes

TIP
Add customizable tags to sticky notes to make it easier to find, organize, and categorize important ideas as themes within your mural.

Step-3: Idea Prioritization:

1.6 Proposed Solution

S. No	Parameter	Description
1.	Problem Statement (Problem to be solved)	<p>Corporates often grapple with inefficient and manual travel approval processes that involve paperwork and a lack of transparency. These outdated methods lead to delays, increased administrative work, and potential compliance issues. The process is a source of stress for employees who require timely approvals to plan their business trips effectively, and it leaves them dissatisfied with the process. Managers, on the other hand, struggle to review and manage a high volume of travel requests while ensuring compliance. The absence of transparency leads to bottlenecks and a lack of visibility, leaving them overwhelmed and frustrated.</p>
2.	Idea / Solution description	<p>Our proposed solution is to develop an Employee Travel Approval Application within Salesforce, offering automation and centralization. The application will provide a user-friendly and automated system that allows employees to submit travel requests seamlessly. Managers will be able to review and approve them efficiently, while the system offers real-time tracking of request statuses. It will also include integration with external systems for expense management, robust security measures, mobile accessibility and analytics tools for data-driven decision-making. The benefits include reduced administrative burdens, improved communication, cost control, and better compliance with corporate policies and regulations.</p>

3.	Novelty / Uniqueness	<p>What sets our solution apart is the innovative use of Salesforce, a highly customizable and powerful platform, to streamline corporate travel management. The automation of approval workflows and integration with external systems will significantly reduce manual work and errors. The mobile app component will provide users with the flexibility and convenience of on-the-go access. Furthermore, the incorporation of robust reporting and analytics tools will enable data-driven decision-making and offer insights into travel expenses, setting our solution apart from conventional methods.</p>
4.	Social Impact / Customer Satisfaction	<p>Our application will have a substantial social impact by enhancing the user experience in corporate travel management. Employees and managers will benefit from a smoother, more transparent, and efficient travel approval process, reducing frustration and uncertainty. The streamlined process will free up time and resources for more strategic tasks, thereby improving overall workforce productivity. Data-driven decision-making will lead to better cost management, making it easier to control expenses and ensuring financial compliance. The application will also guarantee compliance with corporate policies and regulatory requirements, reducing risks and ensuring data security. Lastly, by optimizing travel planning, our solution can contribute to a more sustainable approach to business travel, aligning with corporate sustainability goals.</p>

1.7 Functional & Technical Requirements

1.7.1 Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Management	<p>User Registration: Allow employees to register and log into the system.</p> <p>User Roles: Define roles (employees, managers, travel administrators) with different permissions.</p> <p>User Profiles: Capture and manage user profiles, including contact details.</p>
FR-2	Travel Request Submission	<p>Travel Request Form: Provide an intuitive form for employees to submit travel requests.</p> <p>Expense Entry: Allow users to enter estimated expenses, including flights, accommodation, meals, and incidentals.</p> <p>Travel Dates: Specify departure and return dates, including the option for flexible schedules.</p> <p>Attachments: Enable the attachment of supporting documents, such as itineraries or conference detail</p>
FR-3	Approval workflow	<p>Workflow Automation: Implement an automated approval process with defined workflows.</p> <p>Manager Assignment: Automatically route requests to the appropriate manager based on criteria like department or project.</p> <p>Notifications: Send notifications to managers and employees at various stages of the approval process.</p> <p>Delegation: Allow managers to delegate their approval authority when they are unavailable.</p>
FR-4	Approval Management	<p>Manager Dashboard: Provide managers with a dashboard to view and manage pending travel requests.</p> <p>Request Review: Allow managers to review travel details, expense estimates, and supporting documents.</p> <p>Approval/Rejection: Enable managers to approve or reject requests with comments.</p> <p>Escalation: Implement escalation processes for unattended requests or those exceeding certain thresholds</p>

FR-5	Expense Tracking	<p>Expense Tracking: Record actual expenses incurred during the trip.</p> <p>Receipt Upload: Allow users to upload expense receipts for verification.</p> <p>Expense Categories: Categorize expenses (e.g., transportation, lodging, meals) for reporting.</p> <p>Expense Reconciliation: Compare estimated and actual expenses for cost control.</p>
FR-6	Reporting and Analytics	<p>Reporting Tools: Develop custom reports and dashboards to monitor travel request status and expenses.</p> <p>Analytics: Implement data analytics for insights into travel patterns, expenses, and approval efficiency.</p> <p>Export: Allow users to export reports for offline use or sharing</p>

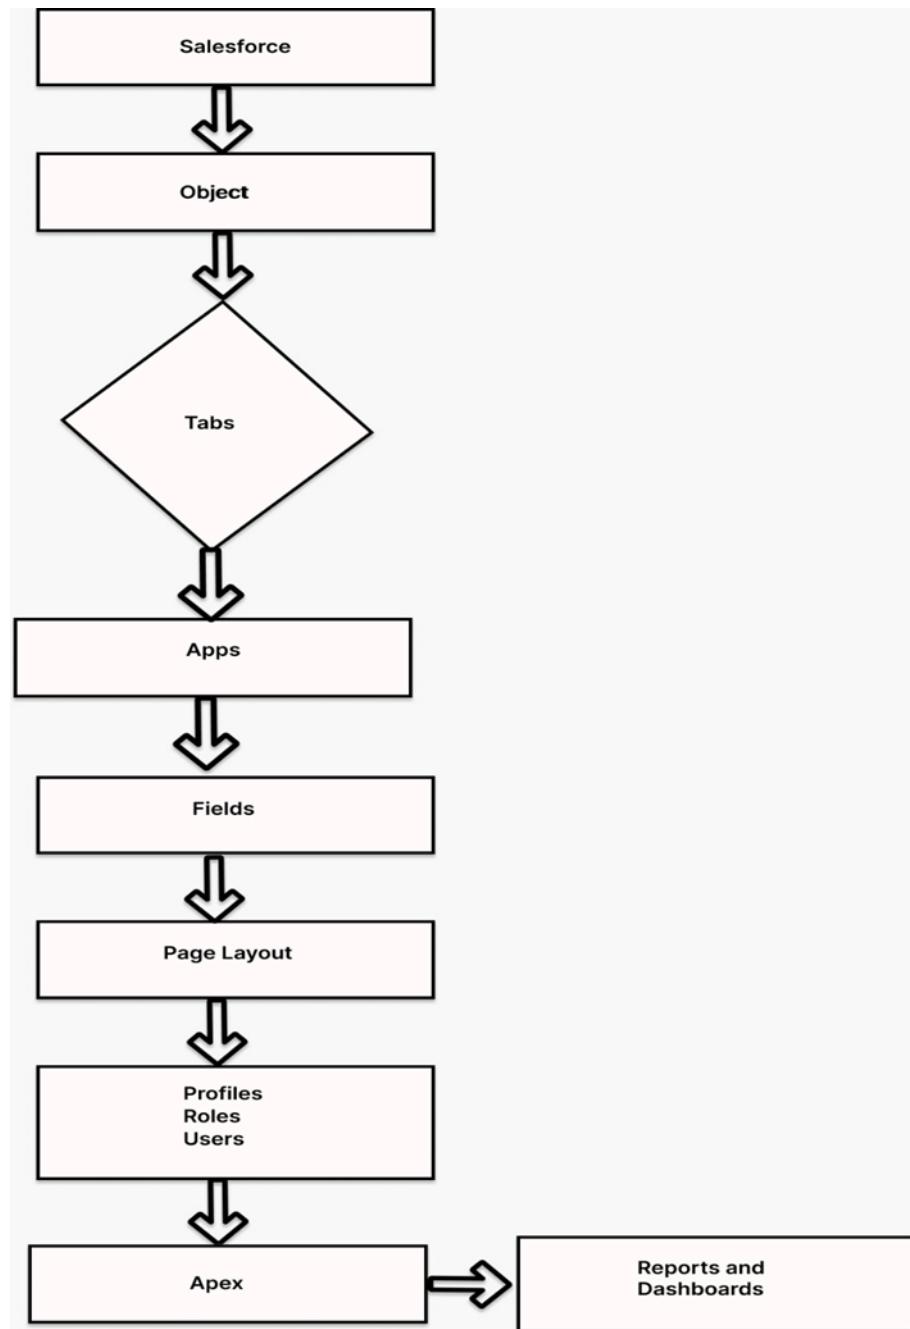

1.7.2 Technical Requirements

TR No.	Technical Requirement	Description
TR-1	Salesforce Environment	Utilize Salesforce's Enterprise or Unlimited edition to ensure scalability and access to advanced features.
TR-2	Development language	Develop using Salesforce's proprietary programming language, Apex, for server-side logic.
TR-3	Security	<ul style="list-style-type: none"> • Implement role-based access control (RBAC) to control who can access and modify data. • Encrypt sensitive data both in transit and at rest. • Utilize Salesforce Shield for enhanced security, including event monitoring and field-level encryption.
TR-4	Integration	<ul style="list-style-type: none"> • Use REST and SOAP APIs for integration with external systems, such as finance and expense management tools. • Implement Single Sign-On (SSO) solutions for seamless and secure access.
TR-5	Customization	Allow administrators to customize and configure the application, including approval workflows, fields, and user profiles.
TR-6	Mobile Accessibility	<ul style="list-style-type: none"> • Ensure that the application is accessible via the Salesforce mobile app for on-the-go request submission and tracking. • Develop a custom mobile app using Salesforce Mobile SDK for more tailored mobile functionality.

1.8 Project Road Map

1.8.1 Data Flow Diagram

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

1.8.2 Technical Architecture

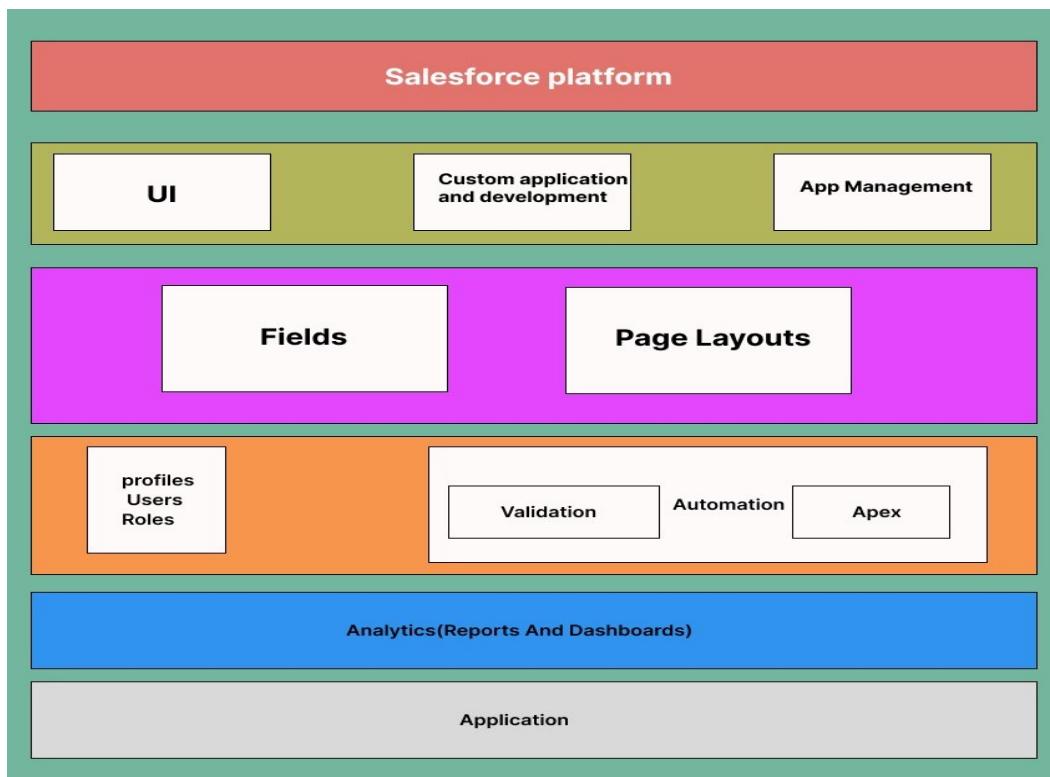

TABLE-1: Component and Technologies:

S.No	Component	Description	Technology
1.	User Interface	<p>Lightning Components: Use Salesforce Lightning components to design the user interface for employees, managers, and administrators.</p> <p>Custom Pages: Create custom Visualforce pages for more tailored and complex UI elements</p>	Salesforce
2.	Data Model	<p>Custom Objects: Define custom objects in Salesforce to represent entities like travel requests, expenses, and approvals.</p> <p>Master-Detail and Lookup Relationships: Establish relationships between objects to maintain data integrity.</p> <p>Custom Fields: Create custom fields to capture specific information, such as travel dates, expenses, and approval status.</p>	Salesforce

3.	Workflow Automation	Approval Processes: Implement Salesforce Approval Processes to automate and streamline the travel request approval workflow. Process Builder and Flows: Use Process Builder and Flows to automate routine tasks and send notifications.	Salesforce
4.	Reporting and Analytics	Custom Reports: Create custom reports to track travel request status, expenses, and other relevant metrics.	Salesforce
5.	Security	Role-Based Access Control (RBAC): Configure RBAC to control who can access and modify data. Data Encryption: Encrypt sensitive data both in transit and at rest. Audit Trails: Maintain audit trails to log user activities for security and compliance purposes.	Salesforce
6.	Salesforce Development	Apex: Use Salesforce's proprietary programming language, Apex, for server-side logic and data manipulation. Visualforce: Develop custom user interfaces with Visualforce pages and components. Lightning Web Components: Create modern, component-based UIs using Lightning Web Components for a more responsive and dynamic user experience	Salesforce

Table-2: Application Characteristics:

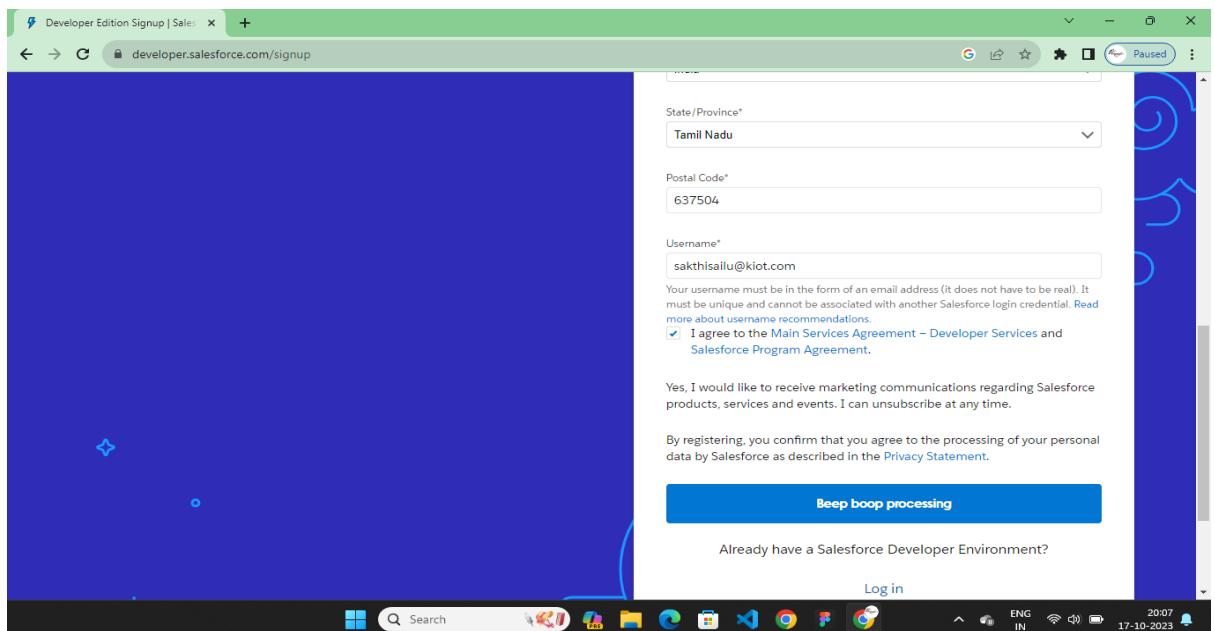

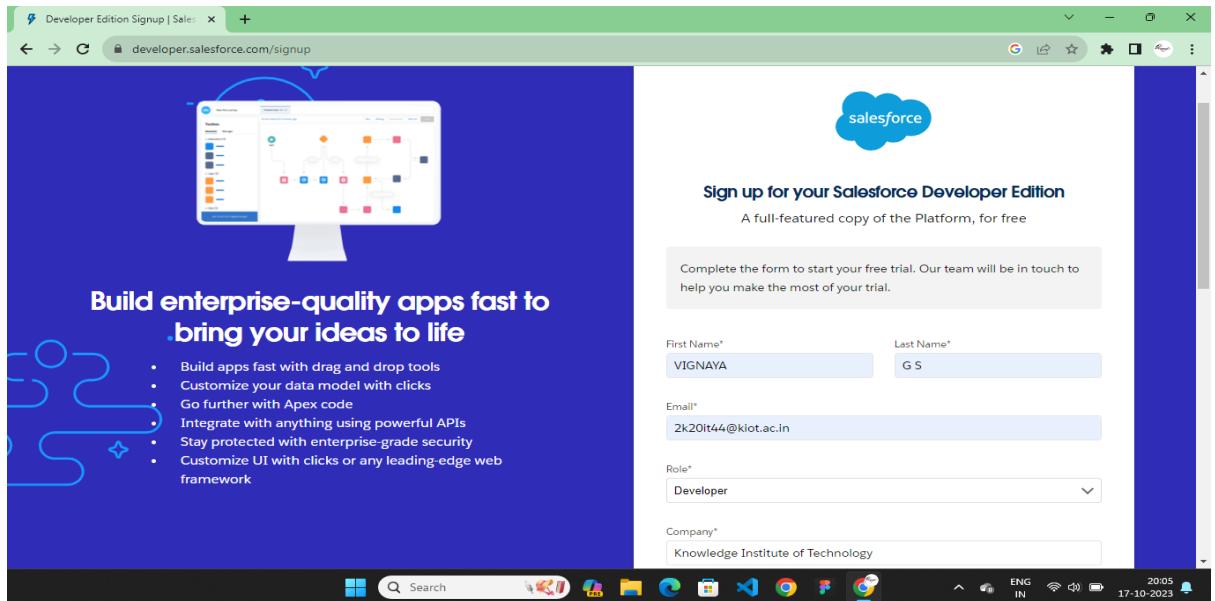

S. No	Characteristics	Description	Technology
1.	Responsive Design	Implement responsive design to adapt to various screen sizes, ensuring a consistent and visually pleasing user experience.	salesforce
2.	Accessibility	Ensure that the application is accessible via multiple devices and browsers, catering to users on desktops, tablets, and mobile devices. This accessibility is crucial for users who need to make or approve travel requests while on the go.	salesforce
3.	User-friendly	The application should have an intuitive and user-friendly interface to make it easy for employees, managers, and administrators to navigate and use the system without extensive training.	Salesforce
4.	Scalability	The application should be able to scale with the growing number of users and data, accommodating increasing demands without significant performance degradation.	salesforce
5.	Performance	Ensure the application's performance meets or exceeds user expectations, with rapid response times for actions such as submitting requests or generating reports.	salesforce
6.	Reporting and Analytics	Enable users to generate custom reports and access analytics tools to gain insights into travel patterns, expenses, and approval efficiency.	salesforce

CHAPTER-2

PREPARATION DATA MODELING

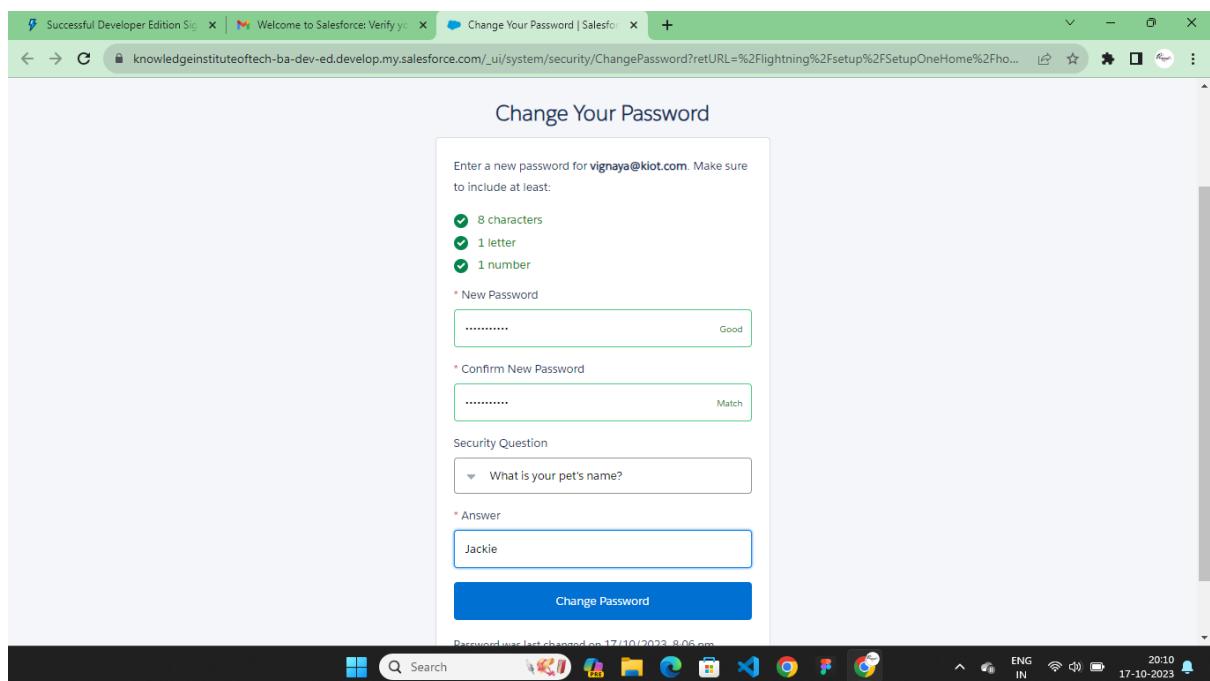

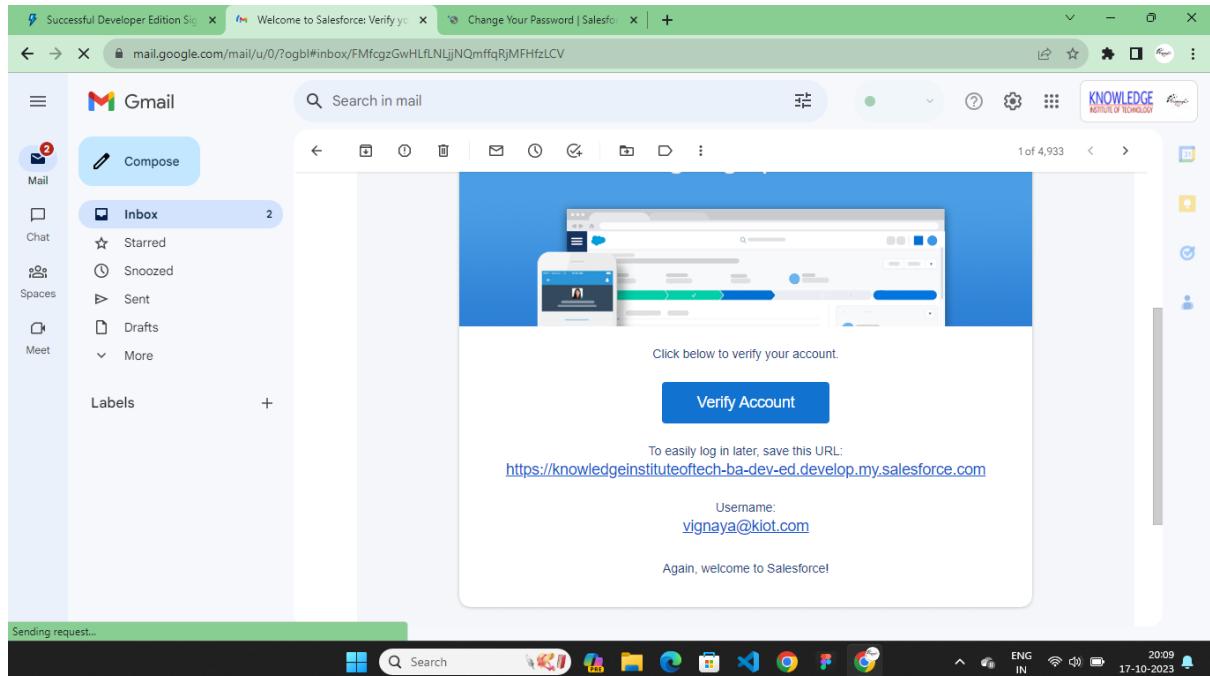

2.1 Salesforce Developer Org

In Salesforce, a Developer Sign Up or Developer Edition is a special type of Salesforce environment that is primarily used for development, testing, and learning purposes.

Account Activation

Activation tracks information about devices from which users have verified their identity.

2.2 Custom Object Creation & Tabs

Custom Object Creation

Objects are containers for your information, but they also give you special functionality.

Custom objects are created to store information that's specific to your company or industry.

Custom Objects in Travel Approval App:

The screenshot shows the Salesforce Object Manager interface. The top navigation bar includes tabs for 'Recently Viewed | Travel Approval' and 'Object Manager | Salesforce'. The main area displays the 'Travel Approval' object details. The left sidebar lists various standard and custom objects under 'LABEL'. The main table lists fields for the 'Travel Approval' object, including:

Label	Type	Description	Last Modified	Deployed
Expense Items	Standard Object			
Expense	Standard Object			
Department	Standard Object			
Employee Detail	Standard Object			
Payment Method	Standard Object			

Fields in Travel Approval Object

The screenshot shows the 'Fields & Relationships' page for the 'Travel Approval' object. The left sidebar lists various setup items like Page Layouts, Lightning Record Pages, etc. The main table displays fields for the 'Travel Approval' object, including:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedBy	Lookup(User)		
Department	Department_c	Lookup(Department)		
Destination State	Destination_State__c	Text(2)		
Employee Name	Employee_Name__c	Lookup(Employee Detail)		
Last Modified By	LastModifiedBy	Lookup(User)		
Out Of State	Out_Of_State__c	Checkbox		
Owner	OwnerId	Lookup(User/Group)		
Purpose of Trip	Purpose_of_Trip__c	Text Area(255)		
Status	Status__c	Picklist		

Build A Employee Travel Approval Application For Corporates

The screenshot shows the Salesforce Object Manager interface for the 'Travel Approval' object. The left sidebar lists various setup options like Details, Fields & Relationships, Page Layouts, etc. The main area displays a table titled 'Fields & Relationships' with 14 items. The columns show Field Label, Field Name, and Data Type. Key fields include 'Out Of State' (checkbox), 'Owner' (Lookup(User,Group)), 'Purpose of Trip' (Text Area(255)), 'Status' (Picklist), 'Status Indicator' (Formula (Text)), 'Total Expenses' (Roll-Up Summary (SUM Expense Items)), 'Travel Approval' (Auto Number), 'Trip End Date' (Date), and 'Trip Start Date' (Date). Navigation bars at the bottom include 'Search', 'Setup', 'Home', and 'Object Manager'.

Fields in Department Object

The screenshot shows the Salesforce Object Manager interface for the 'Department' object. The left sidebar lists various setup options like Details, Fields & Relationships, Page Layouts, etc. The main area displays a table titled 'Fields & Relationships' with 8 items. The columns show Field Label, Field Name, Data Type, Controlling Field, and Indexed status. Key fields include 'Created By' (Lookup(User)), 'Department Code' (Text(6)), 'Department Name' (Text(80)), 'District' (Text(40)), 'Last Modified By' (Lookup(User)), 'Owner' (Lookup(User,Group)), 'Schoolwebsite' (URL(255)), and 'State' (Text(40)). Navigation bars at the bottom include 'Search', 'Setup', 'Home', and 'Object Manager'.

Fields in Employee Detail Object

The screenshot shows the Salesforce Object Manager interface for the 'Employee Detail' object. The left sidebar lists various setup options like Page Layouts, Lightning Record Pages, and Field Sets. The main area displays a table titled 'Fields & Relationships' with 8 items, sorted by Field Label. The table columns are FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedById	Lookup(User)		
Date of Birth	Date_of_Birth__c	Date		
Department	Department_c	Lookup(Department)	✓	▼
Employee Id	Employee_Id__c	Text(12)		▼
Employee Name	Name	Text(80)	✓	▼
Gender	Gender__c	Picklist		▼
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User/Group)	✓	

Fields in Expense Object

The screenshot shows the Salesforce Object Manager interface for the 'Expense' object. The left sidebar lists various setup options. The main area displays a table titled 'Fields & Relationships' with 6 items, sorted by Field Label. The table columns are FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedById	Lookup(User)		
Employee	Employee__c	Lookup(Employee Detail)	✓	▼
Employee Detail	Employee_Detail__c	Lookup(Employee Detail)	✓	▼
Expense	Name	Auto Number	✓	▼
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User/Group)	✓	

Fields in Expense Items Object

The screenshot shows the Salesforce Object Manager interface for the 'Expense Items' object. The left sidebar has tabs for 'Details', 'Fields & Relationships' (which is selected), 'Page Layouts', 'Lightning Record Pages', 'Buttons, Links, and Actions', 'Compact Layouts', 'Field Sets', 'Object Limits', 'Record Types', 'Related Lookup Filters', 'Search Layouts', 'List View Button Layout', and 'Restriction Rules'. The main area is titled 'Fields & Relationships' and lists six fields: Amount, Created By, Expense Items Name, Expense Type, Last Modified By, and Travel Approval. Each field has a 'FIELD LABEL', 'FIELD NAME', 'DATA TYPE', 'CONTROLLING FIELD', and 'INDEXED' status.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Amount	Amount_c	Currency(16, 2)		
Created By	CreatedById	Lookup(User)		
Expense Items Name	Name	Text(60)		
Expense Type	Expense_Type__c	Picklist		
Last Modified By	LastModifiedById	Lookup(User)		
Travel Approval	Travel_Approval__c	Master-Detail[Travel Approval]		

Tabs

Salesforce Tabs are like the menu options in a software application. They allow you to access specific functions, objects, or data.

The screenshot shows the Salesforce Setup page under the 'User Interface' section, specifically the 'Tabs' tab. The left sidebar has tabs for 'User Interface', 'Rename Tabs and Labels', and 'Tabs' (which is selected). The main area is titled 'Custom Tabs' and contains a sub-section 'Custom Object Tabs' with a table showing five tabs: Departments, Employee Details, Expense Items, Expenses, and Travel Approvals. It also includes sections for 'Web Tabs' and 'Visualforce Tabs'.

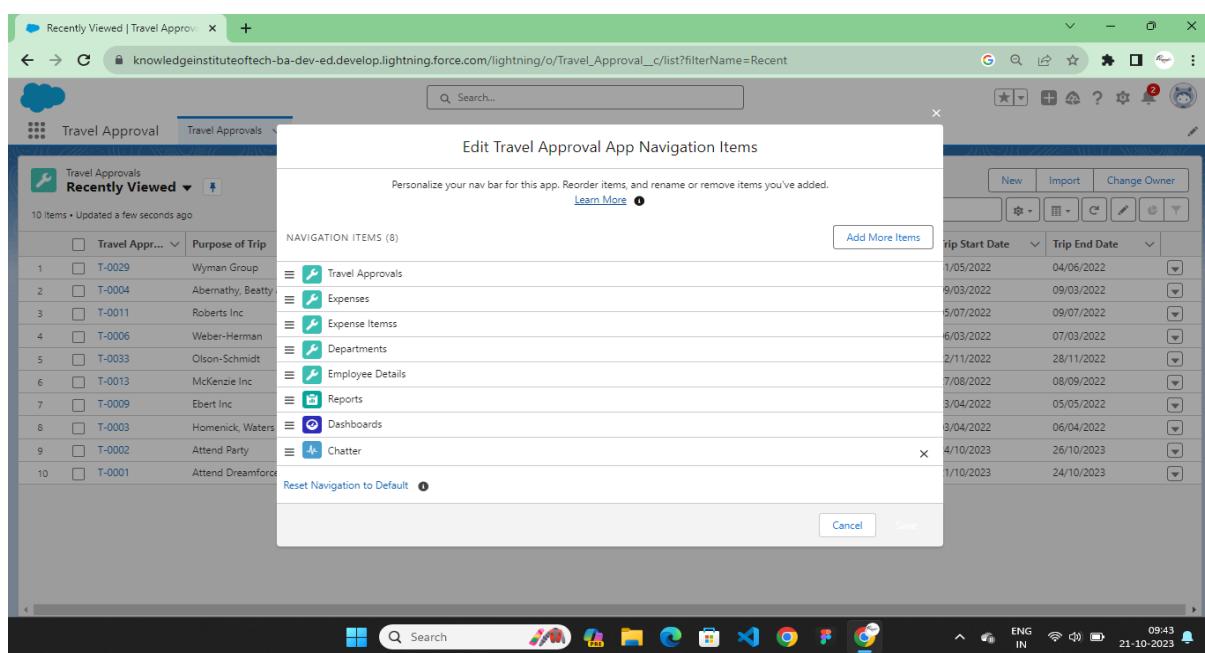

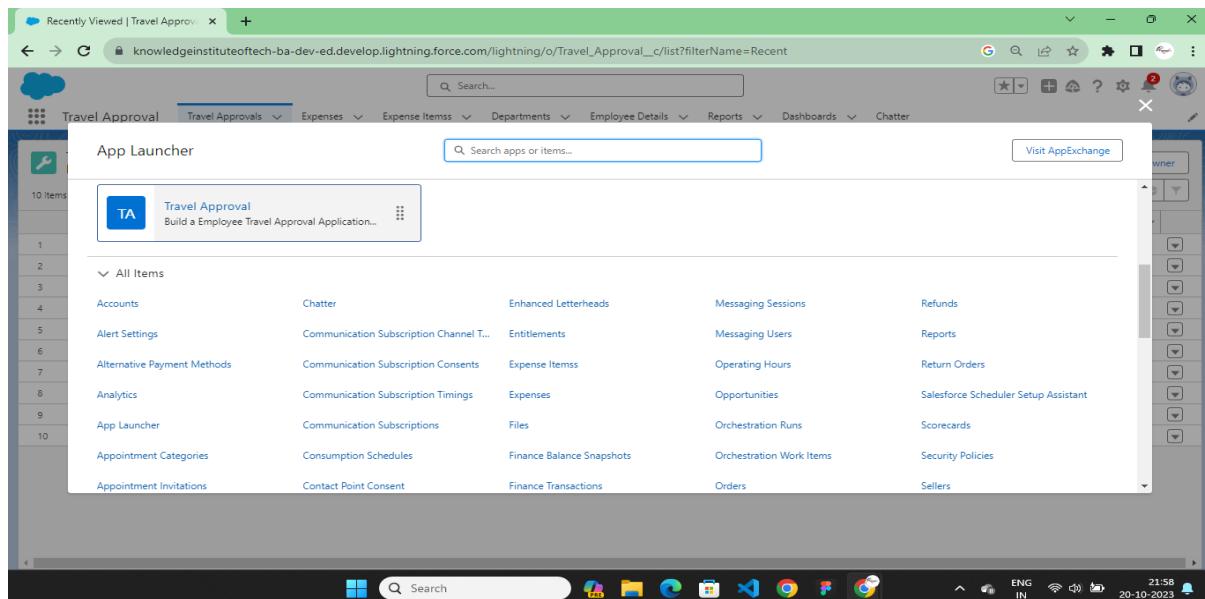

Action	Label	Tab Style	Description
Edit Del	Departments		
Edit Del	Employee Details		
Edit Del	Expense Items		
Edit Del	Expenses		
Edit Del	Travel Approvals		

2.3 Lightning App

The Lightning App Builder is a point-and-click tool that makes it easy to create custom pages for the Salesforce mobile app and Lightning Experience, giving your users what they need all in one place.

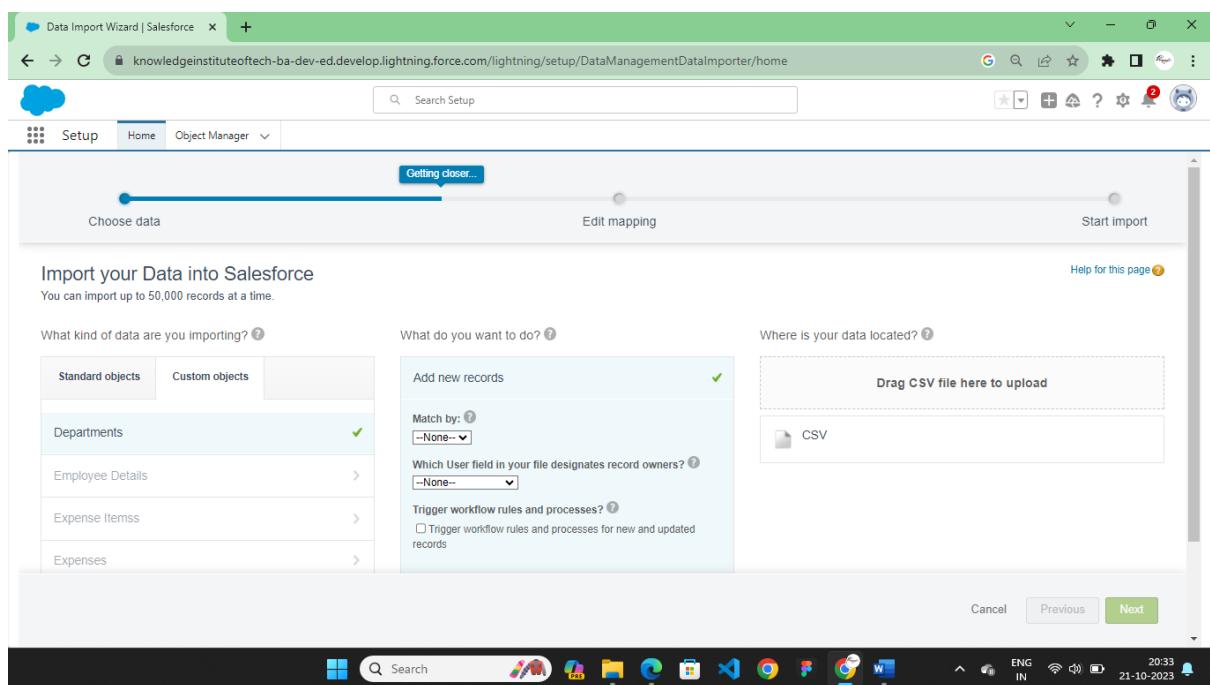

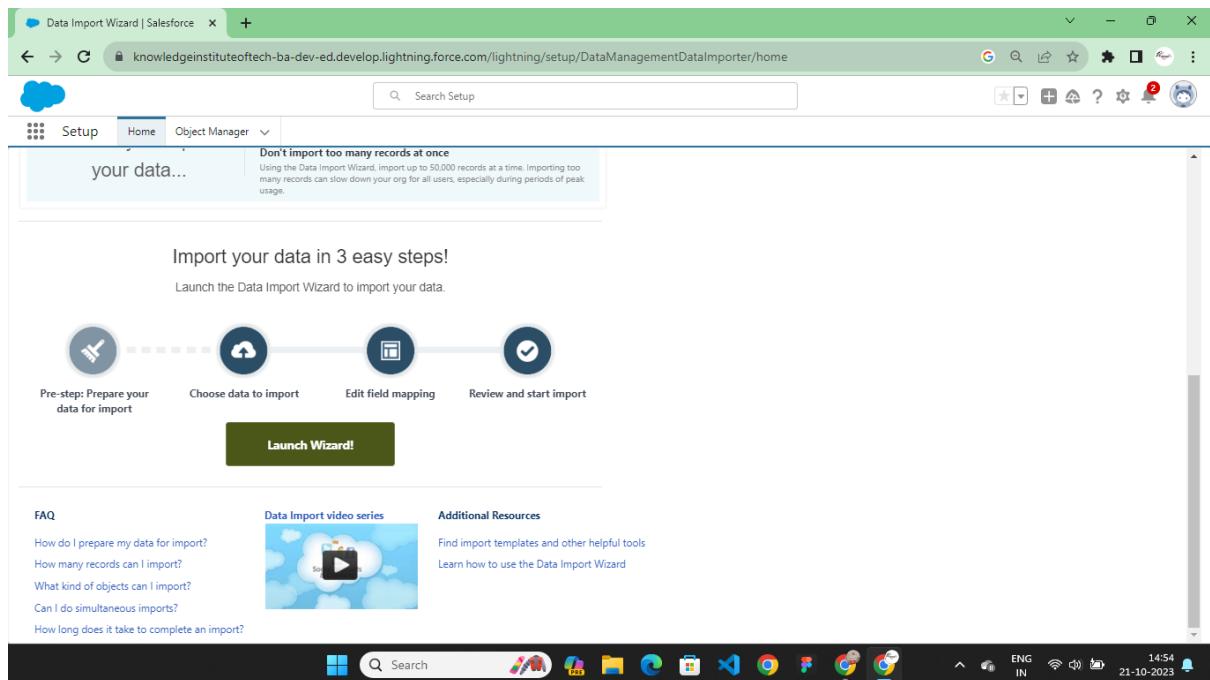

Create a Travel Approval Lightning App

- Build a Lightning app, add tabs, and customize page layouts.
- Create custom objects and fields for the app.
- Define relationships between objects.
- Import data and test the app.

Data Import

The Data Import Wizard is one of various tools available to Salesforce users for importing data. The tool is best used when importing data into the Account, Contact, Lead, or Solution objects along with any custom objects within your Salesforce organization.

2.4 Relationship between Objects

Master-Detail Relationship

A master-detail relationship defines the relationship between the parent and the child. The master table defines the parent relation and the detail defines the child relation.

The screenshot shows the Salesforce Object Manager interface. A custom field named 'Travel Approval' is being created under the 'Expense Items' object. The 'Fields & Relationships' tab is selected. In the 'Custom Field Definition Detail' section, the 'Field Label' is 'Travel Approval', 'Field Name' is 'Travel_Approval', and 'API Name' is 'Travel_Approval__c'. The 'Object Name' is 'Expense Items' and the 'Data Type' is 'Master-Detail'. Under 'Master-Detail Options', the 'Related To' field is set to 'Travel Approval' and the 'Child Relationship Name' is 'Expense_Items'. The 'Sharing Setting' is 'Read/Write: Allows users with at least Read/Write access to the Master record to create, edit, or delete related Detail records.'

Look up Relationship

Lookup Relationship in Salesforce relates two objects together but does not affect deletion (cascade delete functionality) or security.

The screenshot shows the Salesforce Object Manager interface. A custom field named 'Employee Detail' is being created under the 'Expense' object. The 'Fields & Relationships' tab is selected. In the 'Custom Field Definition Detail' section, the 'Field Label' is 'Employee Detail', 'Field Name' is 'Employee_Detail', and 'API Name' is 'Employee_Detail__c'. The 'Object Name' is 'Expense' and the 'Data Type' is 'Lookup'. Under 'Lookup Options', the 'Related To' field is set to 'Employee_Detail' and the 'Child Relationship Name' is 'Expenses'. The 'Required' checkbox is checked. The 'What to do if the lookup record is deleted?' dropdown is set to 'Clear the value of this field.'

Build A Employee Travel Approval Application For Corporates

The screenshot shows the Salesforce Object Manager interface for the 'Travel Approval' object. A new custom field, 'Department', is being created under the 'Fields & Relationships' tab. The 'Field Information' section shows the field label as 'Department', field name as 'Department', API name as 'Department__c', and object name as 'Travel_Approval'. The 'Lookup Options' section indicates it is related to 'Department' and lists 'Travel Approvals' as the child relationship name. The 'Rollup Filter' section is collapsed.

Roll-up Summary

Roll-Up Summary Fields in Salesforce summarize data of particular fields from a set of related detail records and automatically display the output on the master record.

The screenshot shows the Salesforce Object Manager interface for the 'Travel Approval' object. A new custom field, 'Total Expenses', is being created under the 'Fields & Relationships' tab. The 'Field Information' section shows the field label as 'Total Expenses', field name as 'Total_Expenses', API name as 'Total_Expenses__c', and object name as 'Travel_Approval'. The 'Roll-Up Summary Options' section shows the data type as 'Roll-Up Summary', summarized object as 'Expense Items', field to aggregate as 'Expense Items: Amount', and summary type as 'SUM'. The 'Filter Criteria' section is collapsed.

2.5 Customize User Interface

Customize your app's page layouts, compact layouts, and actions.

Page Layout

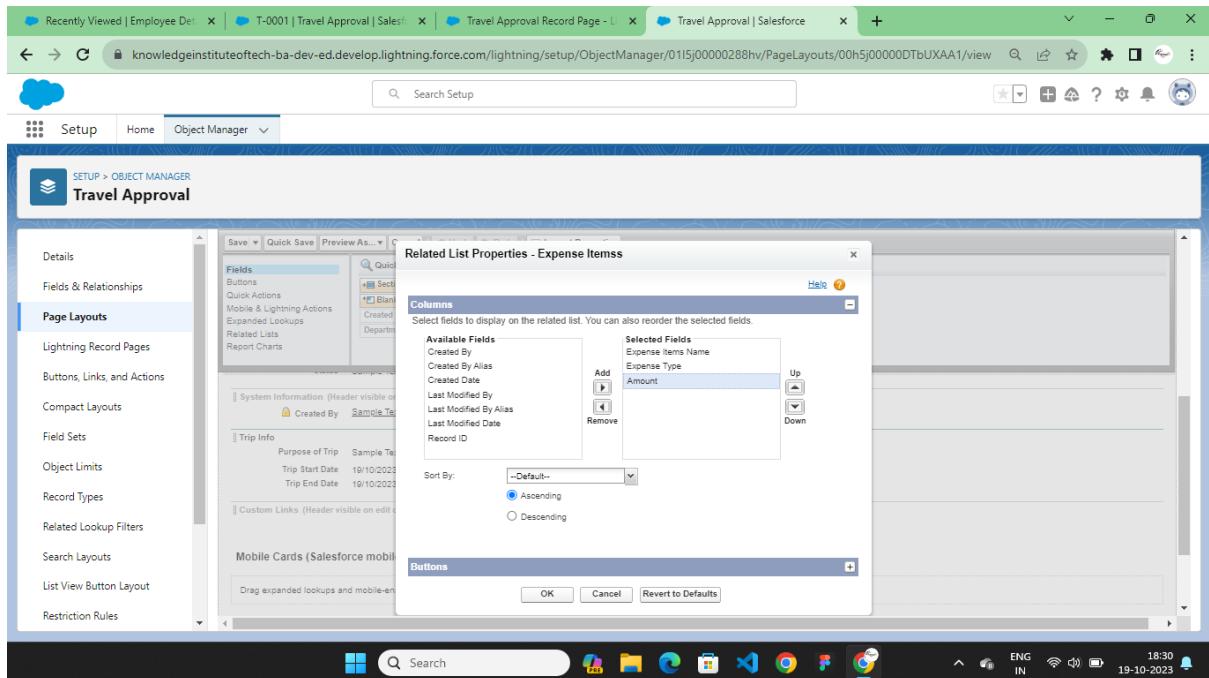

A page layout determines the fields, sections, related lists, and buttons that appear when users view or edit a record. You can modify an object's default page layout or create a custom page layout.

Build A Employee Travel Approval Application For Corporates

The screenshot shows the Lightning App Builder interface. At the top, there are three tabs: 'Recently Viewed | Employee Det...', 'T-0001 | Travel Approval | Sales...', and 'Travel Approval Record Page - L...'. The current tab is 'Travel Approval Record Page'. The main area displays a 'Travel Approval' record page with fields like 'Purpose of Trip', 'Address/Dreamforce', 'Date', 'Outfit', 'Trip Start Date', 'Trip End Date', 'City of Visit', 'Destination State', 'CA', 'Department', and 'Technology'. On the left, a sidebar lists 'Components' and 'Fields' under 'Standard (34)'. Components include Accordion, Action Launcher, Actions & Recommendations, Assessment List, CRM Analytics Collection, CRM Analytics Dashboard, Dynamic Related List - Single, Einstein Next Best Action, Flow, Flow Orchestration Work Guide, Highlights Panel, and Launchpad. The bottom status bar shows the URL 'knowledgeinstituteoftech-ba-dev-ed.lightning.force.com/visualEditor/appBuilder.app?id=flexpage__default_rec_L&recordId=a045j00000LNCdBAAX&clon...', the date '19-10-2023', and the time '18:19'.

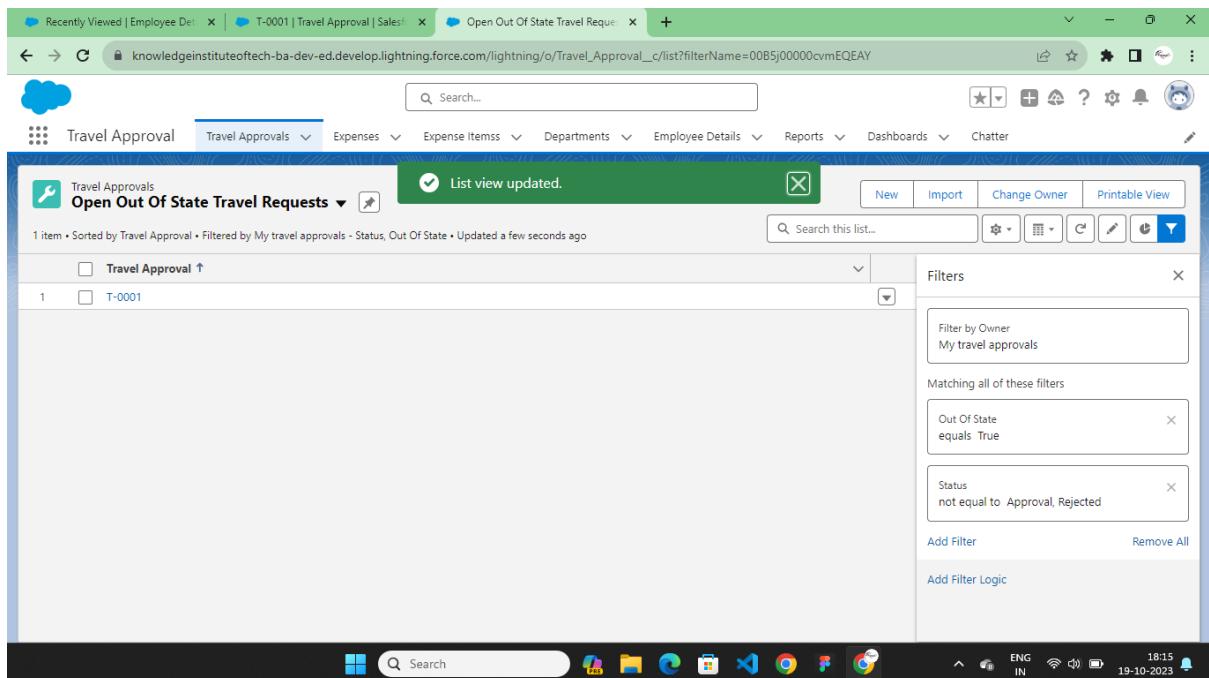

The screenshot shows the Salesforce Setup interface. The top navigation bar includes 'Recently Viewed | Employee Det...', 'T-0001 | Travel Approval | Sales...', 'Travel Approval Record Page - L...', and 'Travel Approval | Salesforce'. The current section is 'SETUP > OBJECT MANAGER'. The left sidebar shows 'Page Layouts' selected, with other options like 'Lightning Record Pages', 'Buttons, Links, and Actions', 'Compact Layouts', 'Field Sets', 'Object Limits', 'Record Types', 'Related Lookup Filters', and 'Search Layouts'. The main content area shows a table titled 'Page Layouts' with one item: 'Travel Approval Layout' created by 'VIGNAYA G S' on '17/10/2023, 8:40 pm' and modified by 'VIGNAYA G S' on '19/10/2023, 6:26 pm'. The bottom status bar shows the URL 'knowledgeinstituteoftech-ba-dev-ed.lightning.force.com/lightning/setup/ObjectManager/01I5j00000288hv/PageLayouts/view', the date '19-10-2023', and the time '18:26'.

Build A Employee Travel Approval Application For Corporates

List View

A list view is a set of search conditions that displays records that match the search conditions.

Search Layout

Create search layouts for standard and custom objects, ensuring the layout shows users what's most relevant to them.

	Travel Appr...	Purpose of Trip	Department	Status	Destinati...	Trip Start Date	Trip End Date

2.6 Business Logic

Validation Rules

Validation rules let you set up business-specific criteria to prevent users from saving invalid data in one or more fields.

A validation rule evaluates a formula when a record is saved.

If a rule's criteria aren't met, users see a custom error message and the record doesn't save.

If a rule's criteria are met, the record saves.

Use validation rules to improve data quality by applying conditions, ensuring proper formatting, and enforcing consistency.

The screenshot shows a Salesforce browser interface. The address bar displays the URL: knowledgeinstituteoftech-ba-dev-ed.lightning.force.com/lightning/setup/ObjectManager/page?address=%2F03d5j000000RGcA. The top navigation bar includes tabs for Recently Viewed, Travel Approval Record Page, T-0001 | Travel Approval, Object Manager | Salesforce, and Travel Approval Record Page. Below the navigation is a search bar labeled "Search Setup". The main content area is titled "Object Manager" and shows a "Travel Approval Validation Rule". The rule details are as follows:

Validation Rule Detail	
Rule Name	Trip_end_date_after_start_date
Error Condition Formula	<code>Trip_End_Date__c < Trip_Start_Date__c</code>
Error Message	Trip end date must be greater than or equal to start date
Description	
Created By	VIGNAYA.G.S. 19/10/2023, 6:51 pm
Modified By	VIGNAYA.G.S. 19/10/2023, 6:51 pm

At the bottom of the page, there are "Edit" and "Clone" buttons. The status bar at the bottom right shows the system time as 18:51 and the date as 19-10-2023.

CHAPTER-3

USERS & DATA SECURITY

3.1 User Creation & Setup Approvals

Before customizing the travel app, first create a new user, Eric Executive, and set him up as manager. This involves assigning roles and profiles so that Eric has the correct permissions to approve travel requests.

Build A Employee Travel Approval Application For Corporates

The screenshot shows the Salesforce Setup interface with the following details:

- Page Header:** Recently Viewed | Employee Det | Users | Salesforce
- Search Bar:** Search Setup
- Left Sidebar:** Shows the navigation tree under "Users". The "User Management Settings" node is expanded, and the "Users" node is selected.
- Main Content Area:** The "Users" setup page is displayed. It includes sections for:
 - Single Sign On Information:** Federation ID (empty)
 - Locale Settings:** Time Zone (GMT+05:30 India Standard Time (Asia/Kolkata)), Locale (English (India)), Language (English)
 - Approver Settings:** Delegated Approver (empty), Manager (Eric Executive), Receive Approval Request Emails (Only if I am an approver)
- Bottom:** Save, Save & New, Cancel buttons. Taskbar with various icons and system status (ENG IN, 18:07, 19-10-2023).

 - Managers in the Role Hierarchy:** Managers in the Role Hierarchy Help
 - OAuth Apps:** OAuth Apps Help
- Bottom:** Save, Save & New, Cancel buttons. Taskbar with various icons and system status (ENG IN, 18:07, 19-10-2023).

CHAPTER-4

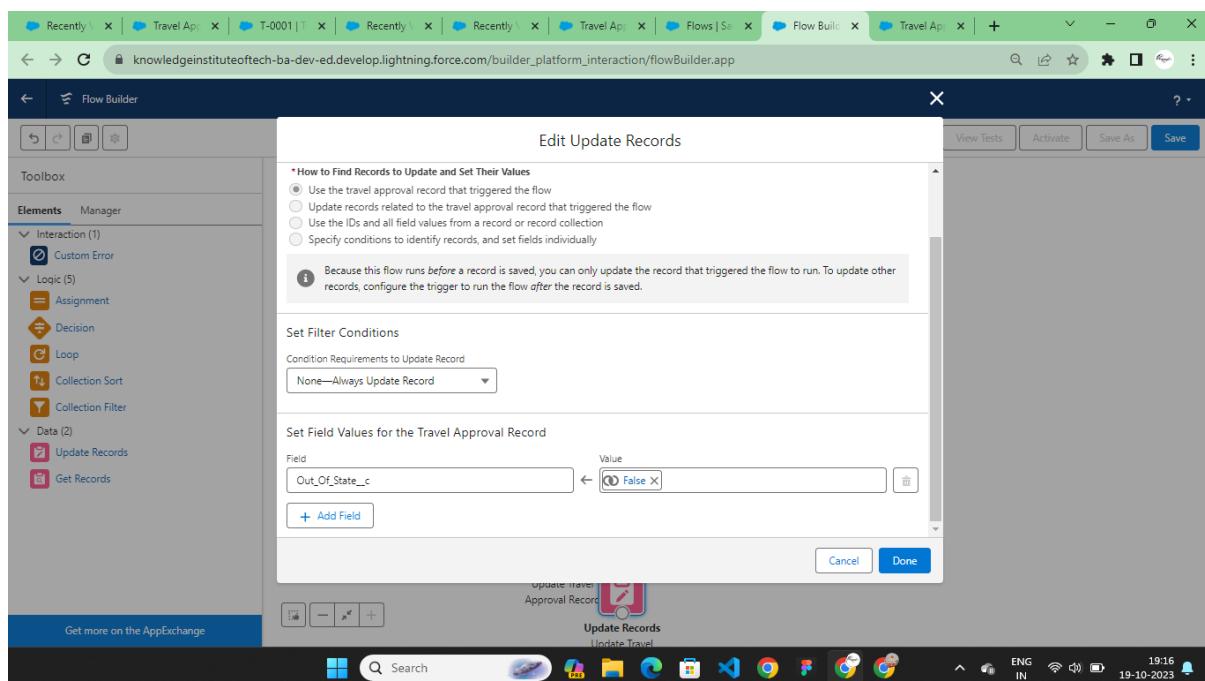

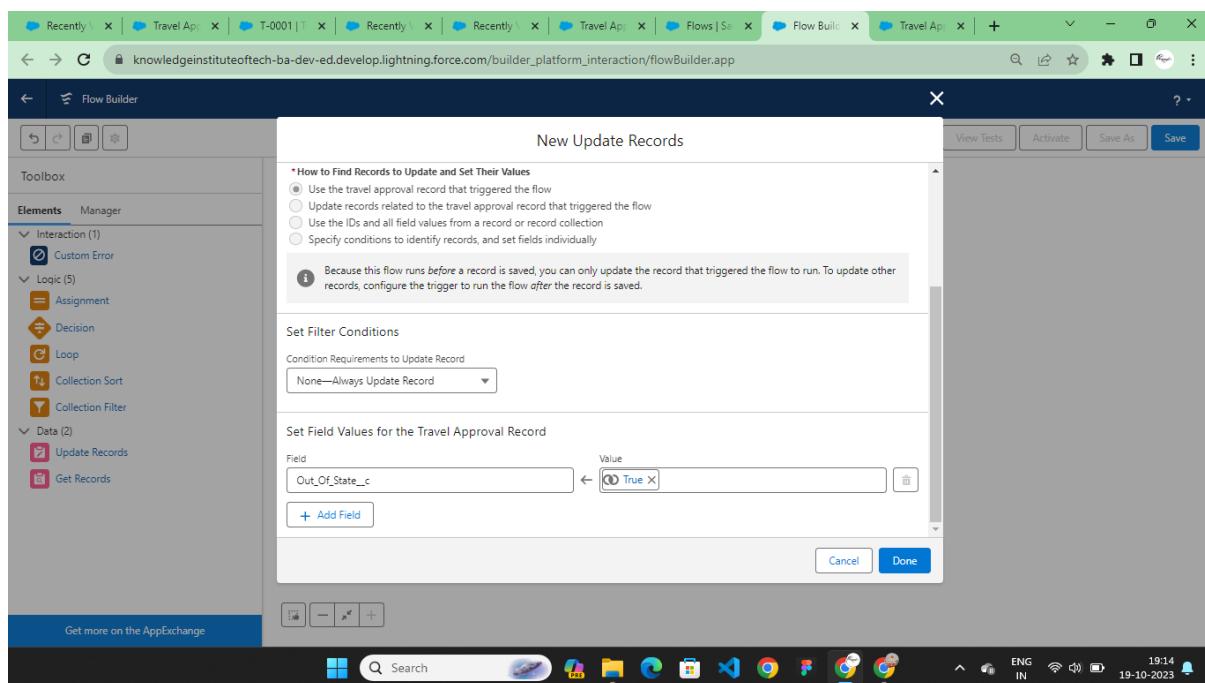

AUTOMATION

4.1 Flow

The last business rule functionality to implement before testing your application is a rule to set the Out-of-State checkbox field on the Travel Approval object if out-of-state travel has been chosen. Salesforce offers workflow capabilities that provide a declarative, drag-and-drop design environment to build our business process logic.

Build A Employee Travel Approval Application For Corporates

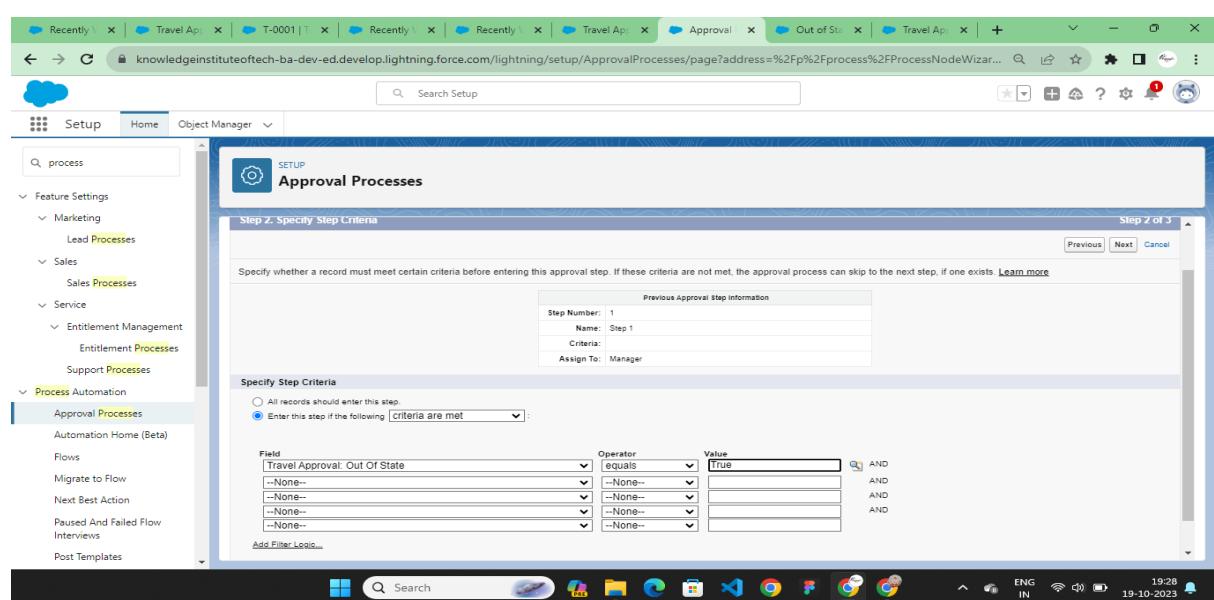

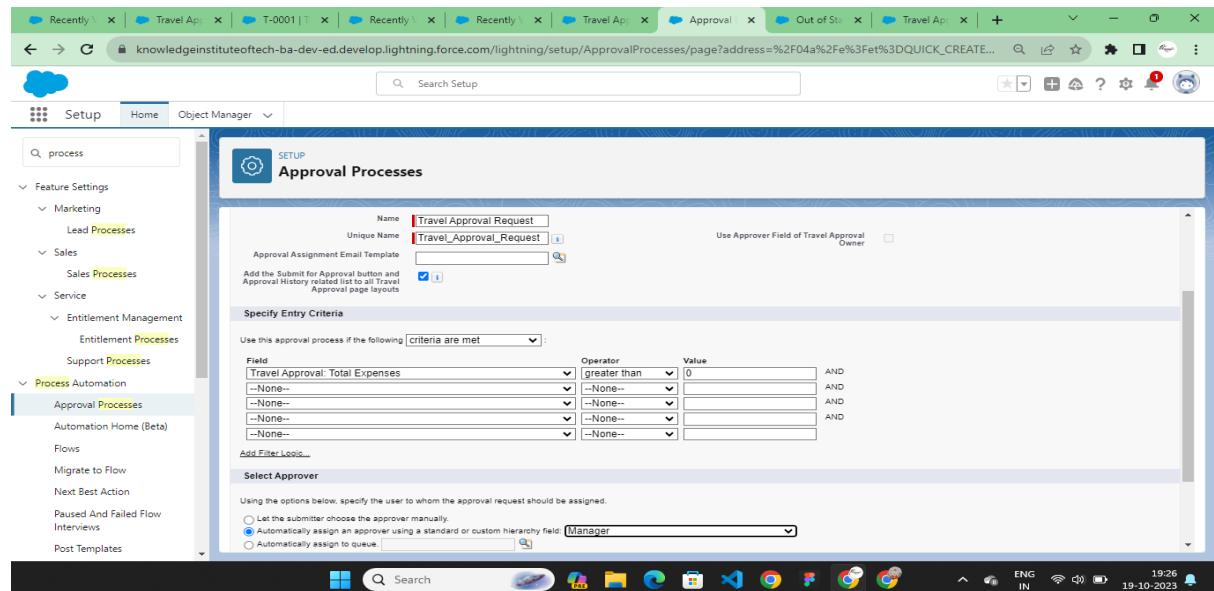

4.2 Approval Process

An approval process is an automated process your agency can use to approve records in Salesforce.

An approval process specifies the criteria a record must meet before it can be submitted for approval, the steps necessary for a record to be approved, and who must approve it at each step.

A step can apply to all records included in the process or just records that have certain attributes. An approval process also specifies the actions to take when a record is approved, rejected, recalled, or first submitted for approval.

Build A Employee Travel Approval Application For Corporates

The screenshot shows the Salesforce Setup interface with the following details:

- Page Title:** Approval Processes
- Section:** Approval Processes
- Form Fields:**
 - Step Number: 1
 - Name: Step 1
 - Criteria:
 - Assign To: Manager
- Select Approver:**
 - Let the submitter choose the approver manually.
 - Automatically assign using the user field selected earlier: (Manager)
 - Automatically assign to queue.
 - Automatically assign to approver(s).
 - User dropdown: VIGNAYA G S
 - Add Row Remove Row
- When multiple approvers are selected:**
 - Approve or reject based on the FIRST response.
 - Require UNANIMOUS approval from all selected approvers.
- Reject Behavior:**
 - The approver's delegate may also approve this request.

The screenshot shows the Salesforce Setup interface with the following details:

- Page Title:** Field Updates
- Section:** Approval Processes
- Form Fields:**
 - Identification:**
 - Name: Set Status to Approved
 - Unique Name: Set_Status_to_Approved
 - Description:
 - Object: Travel Approval
 - Field to Update: Status
 - Field Data Type: Picklist
 - Re-evaluate Workflow Rules after Field Change:
 - Specify New Field Value:**
 - Picklist Options:
 - The value above the current one
 - The value below the current one
 - A specific value: Approval

Final Views

The screenshot shows the Salesforce Lightning interface for a Travel Approval record. The record ID is T-0001. The page includes fields for Trip Start Date (21/10/2023), Trip End Date (24/10/2023), and Destination State (CA). The owner of the record is VIGNAYA G S. The page also features a large blue background image of a topographic map.

The screenshot shows the Salesforce Lightning interface for a Travel Approval record. The record ID is T-0001. The page displays two expense items: Airfare (Amount: ₹450.00) and Hotel (Amount: ₹870.00). The page also features a large blue background image of a topographic map.

Build A Employee Travel Approval Application For Corporates

The screenshot shows a Salesforce Lightning interface for a travel approval application. The main page title is "Travel Approval T-0001". The "Details" tab is selected, displaying the following information:

- Travel Approval: T-0001
- Status: Draft
- Total Expenses: ₹1,320.00
- Status Indicator: (blue gear icon)
- Created By: VIGNAYA G S, 19/10/2023, 2:25 pm
- Last Modified By: VIGNAYA G S, 19/10/2023, 2:25 pm

In the "Trip Info" section, the "Purpose of Trip" is listed as "Attend Dreamforce". The "Out Of State" checkbox is checked. The "Destination State" is listed as "CA".

On the right side, there is a "Chatter" panel with a post from "VIGNAYA G S" asking, "Which department should I associate this travel request with?". A comment from "Eric Executive" says, "Likes this." and "Eric Executive" has responded with "an hour ago".

The bottom of the screen shows a Windows taskbar with various icons.

The screenshot shows the same Salesforce Lightning interface after the travel approval has been submitted. A modal dialog titled "Submit for Approval" is open, displaying the message "successfully submitted".

The "Details" tab still shows the travel approval record with the same information as before. The "Trip Info" section remains the same.

The "Chatter" panel shows the same post and comment from earlier.

The bottom of the screen shows a Windows taskbar with various icons.

CHAPTER-5

REPORTS & DASHBOARD

5.1 Reports

A Salesforce report is a list of data generated based on filter criteria. Salesforce Reports helped us predict trends and gives us the advantage to increase profits.

The report builder provides a drag-and-drop interface to easily build and customize your reports.

The screenshot shows the Salesforce Reports page. At the top, there is a navigation bar with tabs for Recently Viewed, Travel Approval, Approval Processes, Reports, and another Reports tab. Below the navigation bar is a search bar and a toolbar with various icons. The main content area displays a table of recent reports. The table has columns for Report Name, Description, Folder, Created By, Created On, and Subscribed. There are filters on the left for Reports, Recent, and other categories like Created by Me, Private Reports, Public Reports, All Reports, Folders, and Favorites. The table lists three reports:

REPORTS	Report Name	Description	Folder	Created By	Created On	Subscribed
Recent	Travel Requests by Month		Public Reports	VIGNAYA G S	19/10/2023, 8:13 pm	<input type="checkbox"/>
Created by Me	Travel Requests by Department		Public Reports	VIGNAYA G S	19/10/2023, 8:02 pm	<input type="checkbox"/>
Private Reports	Sample Flow Report: Screen Flows	Which flows run, what's the status of each interview, and how long do users take to complete the screens?	Public Reports	Automated Process	17/10/2023, 8:01 pm	<input type="checkbox"/>

At the bottom of the page, there is a taskbar with various application icons and system status indicators.

Build A Employee Travel Approval Application For Corporates

The screenshot shows a Salesforce report interface. At the top, there are several tabs: 'Recently Viewed | Employee', 'Travel Approval | Salesforce', 'Approval Processes | Salesforce', 'Reports | Salesforce', and 'Travel Requests by Department'. Below the tabs, a search bar and a toolbar with icons for star, plus, minus, etc., are visible. The main area is titled 'Report: Travel Approvals' and 'Travel Requests by Department'. It displays a table with the following data:

Department	Trip ID	Status	Out Of State	Destination State	Trip Start Date	Trip End Date
Audit Services (4)	T-0029	Pending Approval	<input checked="" type="checkbox"/>	FL	31/05/2022	04/06/2022
	T-0033	Approved	<input checked="" type="checkbox"/>	CA	22/11/2022	28/11/2022
	T-0048	Rejected	<input checked="" type="checkbox"/>	CA	07/04/2022	19/04/2022
	T-0005	Rejected	<input checked="" type="checkbox"/>	FL	09/08/2022	15/08/2022
Subtotal					4	
Disability Determination Bureau (4)	T-0030	Rejected	<input type="checkbox"/>	TX	15/09/2022	15/09/2022
	T-0041	Rejected	<input checked="" type="checkbox"/>	OK	20/12/2022	20/12/2022
	T-0006	Draft	<input checked="" type="checkbox"/>	OK	06/03/2022	07/03/2022
	T-0011	Submitted	<input checked="" type="checkbox"/>	CA	05/07/2022	09/07/2022
Subtotal					3	
Division of Aging (3)	T-0035	Rejected	<input checked="" type="checkbox"/>	CA	08/06/2022	22/06/2022
	T-0046	Rejected	<input type="checkbox"/>	TX	11/02/2022	11/02/2022
	T-0017	Rejected	<input checked="" type="checkbox"/>	GA	24/12/2022	08/01/2023
Subtotal					2	

At the bottom of the report, there are buttons for 'Row Counts', 'Detail Rows', 'Subtotals', and 'Grand Total'. The status bar at the bottom right shows 'ENG IN' and the date '19-10-2023'.

The screenshot shows the Report Builder interface for creating a new report titled 'New Travel Approvals Report'. The report is set to 'Travel Approvals' and has a preview of the data. The report structure is outlined as follows:

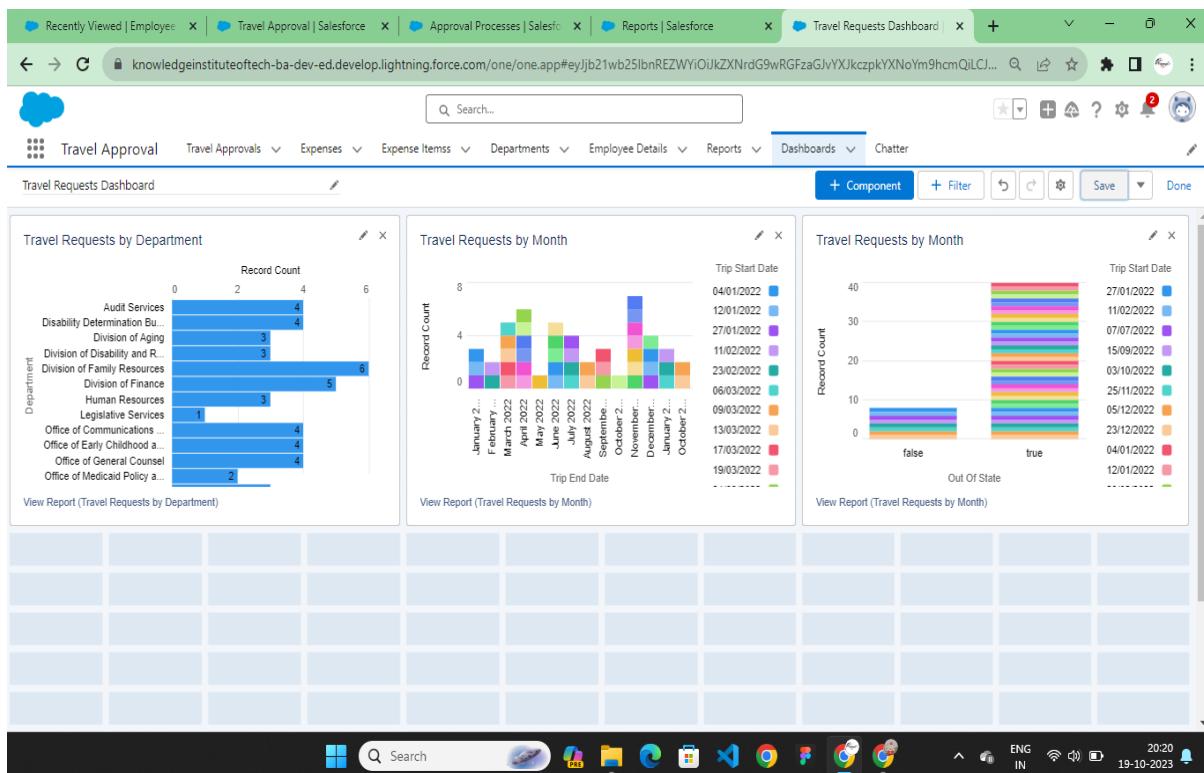

- Groups:**
 - GROUP ROWS: Add group...
 - Trip End Date
 - Trip Start Date
- Columns:**
 - Travel Approval: Travel Approval
 - Department
 - Status
 - # Out Of State
 - Destination State

The preview table shows data grouped by month and department, with subtotals for each group. The columns are: Trip End Date, Trip Start Date, Travel Approval: Travel Approval, Department, Status, Out Of State, and Destination State. The data includes records for January, March, April, and June 2022 across various departments like Audit Services, Office of Early Childhood, Division of Disability, Office of Medicaid Policy, Human Resources, and Division of Aging.

At the bottom of the report builder, there are buttons for 'Run', 'Save & Run', 'Save', 'Close', and 'Run'. The status bar at the bottom right shows 'ENG IN' and the date '19-10-2023'.

5.2 Dashboard

A dashboard provides an interactive visual display of key metrics and trends. Multiple dashboard components can be shown together on a single dashboard layout, creating rich visual displays of multiple reports that have a common theme.

CHAPTER-6

CONCLUSION

In conclusion, the development of an employee travel approval application for corporates is a critical step towards streamlining and enhancing the travel management process within organizations. This application serves as a centralized, efficient, and user-friendly tool for managing employee travel requests, approvals, and associated processes.

In building an employee travel approval application, it's essential to engage relevant stakeholders, including HR, finance, and IT teams, to ensure that the application aligns with organizational goals and requirements. Furthermore, thorough testing and training should be conducted to guarantee a smooth and successful implementation.

By addressing these key points and creating a tailored travel approval application that aligns with the unique needs and policies of the corporate, organizations can enhance their travel management processes, improve cost control, and provide a more satisfying experience for employees and travel administrators alike.
